

Welcome to where ever you are !

“Exploring personal computing with Linux”

- Kevin Verma
20090918

Why use Linux ?

Because its not free \$#2@3 !

Because its not an OS, its a gaint Pizza with everything on it except big white elephants !

Because its setup only once & use forever desktop !

Because it has only few viruses !

Because with Linux you can ignore recessions !

Because it will lock you out if you don't pay attention to CAPS lock !

Because it helps your grandma at home not in jail !

Fedora 11 Installation in 20mins !

Will it Work ???
